

## Stories of Chhange Water Supply Scheme

### How drinking water change quality of life.....

Chhange Water supply improvement scheme located at Dhulikhel Municipality, ward no. 1, Devitar, Chhange is very close to district headquarter Dhulikhel but was having severe problem of drinking water in the community. People of this community are mostly engaged in agriculture and animal husbandry. People used to drink water from traditional ponds, streams without any purification (Shown in picture 1).

Sushila Tamang (in the picture) is one of the beneficiaries of Chhange WSS who used to drink unsafe water from the pond. She said “Around 10 household used to drink water from the pond and also they used to walk for 45 minutes to fetch water from that pond”.

Sukra Kumari Tamang of Chhange WSS said “She can now save her time which she used to spend to bring water walking a long distance and she can now use that time in profitable work”.

In this way, Community of Chhange WSS has been

*Picture 1: Sushila Tamang used to drink water from this pond Before Implementation of the scheme*
